

**TOWN OF NUCLA
SEWER TAP APPLICATION**

Name: _____

Date: _____

Address: _____

Mailing Address: _____

Phone #: _____

The Town of Nucla has adopted the following policy, which outlines the services that the Town will provide in the installation of a sewer tap and the conditions under which extra fees will be charged. Effective August 28, 2013.

The tap fee for a standard 4 inch sewer service will be \$2000.00. Fees for larger diameter taps and main line extensions will be approved based upon impact to the surrounding collection system.

When a Sewer tap within the Town sewer system is purchased from the Town, the Town will furnish the labor and materials needed to tap the sewer main, install the service pipe from the main to the property line – providing that the cost of labor and materials does not exceed five hundred dollars (\$500.00). If the cost exceeds this amount the additional cost will be added to the tap fee and paid by the tap purchaser.

In every installation, either within or outside the Town limits, the sewer line will be installed up to the property line. Any extensions beyond the property line are the responsibility of the tap purchaser.
