3 inch Tap	Depends on cost of meter and line	
4 inch Tap	Depends on cost of meter and line	
6 inch Tap	Depends on cost of meter and line	

The Town of Nucla has adopted the following policy, which outlines the services that the Town will provide in the installation of a tap and the conditions under which extra fees will be charged. Effective June 14, 2007.

When a water tap within the Town limits is purchased from the Town, the Town will furnish the labor and materials needed to tap the water main, install the service pipe from the main to the meter and install the meter – providing that the cost of labor and materials does not exceed five hundred dollars (\$500.00). If the cost exceeds this amount the additional cost will be added to the tap fee and paid by the tap purchaser.

When a water line is installed to provide a water tap outside the Town limits, that installation will be constructed by using a minimum of six inch (6inch) diameter pipe from the point of attachment to an existing Town main to the point where the meter is installed. The Town will provide up to five hundred dollars (\$500.00) for labor and materials used in the installation. If the cost exceeds this amount the additional cost will be added to the tap fee and paid by the tap purchaser.

In every installation, either within or outside the Town limits, the meter will be installed at the property line. Any extensions beyond the meter are the responsibility of the tap purchaser. If blasting is required in making any installation the tap purchaser shall assume all responsibility including cost and liability for any such necessary work.
