2"	\$ 11,500.00	2"	\$ 21,500.00
3" and larger	cost plus impact fee	3" and larger	cost plus impact fee

The Town of Nucla has adopted the following policy outlining the services that the Town will provide in the installation of a tap and the conditions under which extra fees will be charged.

Effective April 13, 2022

When a water tap within Town limits is purchased the town will furnish the labor and materials need to tap the water main, install the service pipe from the main to the meter and install the meter (at property line), provided that the cost of labor, equipment and materials does not exceed one thousand five hundred dollars (\$1,500.00). If costs exceed this amount the additional cost will be added to the tap fee and paid by the tap purchaser.

When a water tap outside of town limits is purchased the town will install a 6" diameter pipe from the point of attachment at an existing main line to the point where the meter will be installed (property line), provided that the cost of labor, equipment, and materials does not exceed one thousand five hundred dollars (\$1,500.00). If costs exceed this amount the additional cost will be added to the tap fee and paid by the tap purchaser.

In every installation the meter will be installed at main line. Property owner is responsible for service line beyond meter location. Any extensions beyond the meter are the responsibility of the tap purchaser. If blasting is required in making any installation the tap purchaser shall assume all responsibility, including cost and liability for any necessary work.
